

Yubikey 5C NFC

- Product Description

The YubiKey 5 (USB Type A) Series is a hardware based authentication solution that provides superior defence against phishing, eliminates account takeovers, and enables compliance requirements for strong authentication. It offers multi-protocol support including FIDO2, Yubico OTP, OATH HOTP, U2F, PIV, and Open PGP. It supports single factor password less login and multi-factor authentication in conjunction with user touch and PIN.

- Reduce IT Operational Costs

The ease of use and reliability of the YubiKey is proven to reduce password support incidents by 92%. This was documented in a research paper by Google, describing the Google employee rollout to more than 70 countries. Deployments are faster and cost less with the YubiKey's industry leading support for numerous protocols, systems and services.

- Specifications

- ✓ **USB Type:** USB-C
- ✓ **NFC-enabled:** Yes
- ✓ **Authentication Methods:** Password less, Strong Two Factor, Strong Multi-Factor
